

The drugs included in this guide are associated with quantity limit levels which have been enacted to help ensure proper utilization. However, this list does not dictate or control decisions regarding appropriate care. As always, you and your health care provider make the final decision on which medication(s) is/are right for you.

This list is subject to change with or without notice. Contact Express Scripts at 1-866-727-5867, for the most up-to-date information regarding specific quantity limit levels.
