Formulary Drug List
by Therapy Class

The following is a list of commonly prescribed drugs. It represents an abbreviated version of the drug list (formulary) that is at the core of your prescription drug benefit plan. This list does not guarantee coverage and is subject to change with or without notice. Check your benefit materials for coverage information, including the co-payments/co-insurances and any requirements associated with your prescription drug benefit program. For specific questions about your coverage, please call the phone number printed on your ID card.

PLEASE NOTE: The symbol * next to a drug signifies that it is subject to non-formulary status when a generic becomes available throughout the year.

KEY

The symbol [INJ] next to a drug name indicates that the drug is available in injectable form only.

For the member: Generic medications contain the same active ingredients as their corresponding brand-name medications, although they may look different in color or shape. They have been FDA-approved under strict standards.

For the physician: Please prescribe formulary products and allow generic substitutions when medically appropriate. Thank you. Brand-name drugs are listed in CAPITAL letters.

Generic drugs are listed in lower case letters.
